

Finecto⁺ Protect

LICE, MITE AND FLEA REJECTING

For chickens, birds, reptiles and horses

 100% natural, no poison

Usage:

Prevent irritation among your birds, chickens and reptiles. The aromatic fragrances in Finecto^{+Protect} make your animals' home areas unappealing to lice and mites. Keep them out - give the houses a preventative treatment. Spray Finecto^{+Protect} in such a way that the entire space, including laying nests, seams and slits, is damp. Repeat the treatment every 4 to 6 weeks. The unique bonding ensures long-term effect.

Combine the environment treatment with a curative dose of Finecto^{+Oral} if red mites or feather lice are already present. Finecto^{+Protect} promotes the condition, laying performance, hatching results and rest. Solution is ready for use; do not dilute. Sufficient for surface of 12-17 m². Shake well before use. Flush spray head with water after use to prevent blockage.

For itchy horses treat the mane base and/or the tail with Finecto^{+Protect}.

Application:

Animal housing of chickens, birds, reptiles and horses.

This product contains:

Aromatic substances

Instructions:

- Environment spray, not suitable for oral use.
- Keep out of children's reach.
